

IN THE SPECIFICATION:

Please amend the paragraph beginning on page 10, line 1, as follows:

FIG. 5 illustrates an example of stored information in a table or spreadsheet format (for a hypothetical project called "CCE"). FIG. 5 shows examples of message components to be extracted, such as:

Message recipients (recipients' email addresses in column 524),

Message subjects (the subject lines may be extracted from column 522),

Message contents (comments in column 528 may be included in the body of the email message. Additional content may be specified. See for example the "Additional body" line in the sample configuration file below),

Dependency information (in column 522, rows 501 -[[505]] 506), or

Defect information (in column 522, rows 507 -511).
